

The Coven, exiled from their ancestral home, and ruled by the twisted and megalomaniacal Suenthis, establish a base deep within the bowels of a dormant volcano and begin to recruit new followers. Guided by an entity that even the Gods fear, Suenthis is made aware of potential

adversaries among the peoples she seeks to conquer and so orders her priestess Alimon to bring about the death of a family descended from the powerful disciple of the God of War – Balitorn.

The son of Greynard Barony, Marek survives the attack and takes up the mantle of his father's rule, struggling to find the cause of the attack and shore up their defences before more attacks come.

A group of men captured and enslaved by the Coven plot against their cruel masters and seek to escape. Led by a former caravan guard, Falkuri, their destiny will become entwined with the Baronies of the land and a young psychic talent of the Coven who is about to finish her training and graduate into the ranks of the coven's evil sisterhood.
